EDUCATION

Arizona State University | Tempe, Arizona

Aug 2024 – May 2026

Master of Science in Software Engineering

Coursework: Advanced DSA, Software Verification & Testing, Cloud Computing, Game Design, AI for Software Engineers

SRM Institute of Science and Technology | Chennai, India

Sep 2020 – Jun

2024 B.Tech in Computer Science & Engineering

Coursework: DSA, OOP, Frontend, Data Visualization, Machine Learning

WORK EXPERIENCE

Full Stack Developer intern | Aligned rewards (Capstone) , Tempe AZ

Jan 2026 – Apr 2026

- Contributed to the development of a full stack web application in an agile team environment, delivering features across 5 sprints with consistent on-time completion
- Improved frontend responsiveness and data flow by integrating multiple REST API endpoints, reducing manual data handling steps by ~60% and enabling seamless end-to-end user workflows.
- Collaborated cross-functionally with sponsors and team members to define shared data contracts, cutting integration turnaround time by ~40% and ensuring consistency across frontend and backend.
- Integrated a large language model API into the platform to power intelligent goal suggestions, reducing manual input effort by ~50% and improving recommendation relevance through structured prompt engineering and context-aware API design.

PROJECTS

Feature Flag Management Platform – *Next.js, NestJS, PostgreSQL, Redis, AWS ECS Fargate, Terraform, GitHub Actions*

- Architected and deployed a production-ready feature flag system on AWS ECS Fargate, supporting multi-environment rollouts with sub-50 ms SDK response times and 99.9% uptime during internal testing.
- Designed a secure REST API layer with JWT authentication, role-based access control, audit logging, and rate limiting across 15+ endpoints, reducing unauthorized access risk and cutting manual release overhead by 70%.
- Implemented full CI/CD automation using GitHub Actions and Terraform for infrastructure-as-code, reducing deployment time by 80% and enabling consistent, one-click production releases.
- Integrated Redis caching for SDK flag evaluations, achieving sub-50 ms p99 latency and reducing database load by over 60% under simulated concurrent traffic.

BlogDaily – Blogging Website – *React.js, Node.js, Express.js, MongoDB, Tailwind CSS*

- Built a full stack blogging platform from the ground up, handling 100+ concurrent user sessions with optimized media delivery and a 35% improvement in page load performance.
- Engineered a RESTful backend with route-level caching and optimized query patterns, cutting average server response time by 30% and supporting auth, posts, and comment workflows at scale.
- Designed a component-driven React frontend with Tailwind CSS, improving UI responsiveness by 40% across device sizes; implemented tagging, categories, and search for content discoverability.

PUBLICATION

Plant Disease Detection and Classification using Deep Learning – *ICCCI Conference, April 2024*

- Collaborated with a team of 3 and published a conference paper in ICCCI conference in April 2024.
- Processed a dataset of 3000 images and achieved an accuracy of 98%.
- Built a VGG16-based CNN with ReLU activation.

TECHNICAL SKILLS & CERTIFICATIONS

Programming: C, C++, Java, Python, PostgreSQL, HTML, CSS, JavaScript, TypeScript, MERN Stack

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, Redis

CI/CD & DevOps: GitHub Actions, Docker, AWS (EC2, Lambda, ECS Fargate), Terraform

Databases: MongoDB, PostgreSQL, Redis

Certifications: Machine Learning Specialization – Stanford University | Analyzing Big Data with SQL
